KGEA-HBW

Short Range Antenna LF for smart entry system.
External housing (integrated connector) + PU-resin (filled)

**EMITTER ANTENNAS / SHORT RANGE**

**FEATURES**

PREMO offers a short antenna with a high mechanical robustness and also has the best performance electrical on metal surface due to its bridge type design external housing. Integrated connector in the external housing. This part is IP68 waterproof issue.

**CHARACTERISTICS**

- Short antenna (length until 120 mm).
- External housing shape H-bridge (Integrate connector).
- Material PBT-GF30% or PA66-GF30%
- Strong anchor points which provide an easy assembly and will ensure mechanical robustness
- Higher impact absorption and mechanical reduction preventive.
- LF antenna module inside external housing is filled by PU-resin
- IP68 grade Waterproof
- High stability in temperature (-40ºC up to +85ºC).
- Resonant frequency adjusting below +/- 2kHz.
- Custom L-C value (F-Resonant)
- This antenna is designed based on AECQ-200.

**SPECIFICATIONS**

**ELECTRICAL SPECIFICATIONS**

- Operating Frequency @134.2Khz @25ºC @1Vac. (Only L)
- KGEA-HBW-C-0127

Antenna is measured in resonant mode.

**FIELD MAGNETIC STRENGTH**

**PROCEDURE / SETUP**

- Antenna (PREMO) mounted on Reader and signal amplifier (I=1App/meter-distance)
- Probe FM2B 153843 (as receiver) used to measure the magnetic field (dBµV/m).

**RESULT**

125,4 dBµV/m ± 2dB@1 meter (I=1App) in maximum direction.
